Health & Wellness Resource Center

MORE THAN THE WEB

No more huge lists of irrelevant search results. No more scouring the Web for relevant sites. No more relying on information from unknown sources. The *Health & Wellness Resource Center* gives users much more than the Web typically offers.

This revolutionary database answers the need for a fully integrated, evergrowing electronic resource center for all levels of consumer health research. Rely on the *Health & Wellness Resource Center* for instant access to carefully compiled medical reference and periodical materials that your users can trust. It features:

- An updated, easy-to-use interface and searching functionality, including subdivisions and search history

- Hundreds of health/medical journals, newsletters and thousands of pamphlets (more than 75% of which appear in full text)

- Health-related articles from 3,000+ general interest publications

- Full-text, in-depth disease and condition overviews from a broad collection of Gale reference titles, including *The Gale Encyclopedia of Medicine*, *The Gale Encyclopedia of Childhood & Adolescence*, *The Gale Encyclopedia of Cancer*, and *The Gale Encyclopedia of Genetic Disorders*

- Access to trusted health Web sites

- Hundreds of streaming videos from medical experts

AUTHORITATIVE INFORMATION ON TODAY'S HOTTEST TOPICS

Who is at risk for contracting the HPV virus? Are antioxidants really effective? What new drugs are being developed to treat AIDS? These and many other health-related questions are on the minds of students and general researchers. The *Health & Wellness Resource Center* is a user-friendly database that aids consumers who need complete, reliable health information. Whether users need to answer questions they couldn't ask their doctor or want to browse through information on topics of general interest in understandable terms, the *Health & Wellness Resource Center* is the one resource everyone will want to consult.

WHAT IS A RESOURCE CENTER?

Amid the chaos of the Internet, Gale has reserved places just for students and library users. A Resource Center is a safe haven, where an ever-increasing list of primary documents, periodicals and reference information is seamlessly integrated and research skills pay off. Far removed from the pitfalls of the open Web, Resource Centers allow users to determine search criteria, retrieve relevant results and find reliable information in a variety of formats.

INTUITIVE, FULLY UPDATED INTERFACE

The *Health & Wellness Resource Center* features an intuitive interface — providing multiple pathways to key information for both novice and experienced searchers. Its browser style format enables users to browse the latest news, view a featured video, browse disease and condition overviews, search through drug handbooks, or search across the entire database. It offers standard and custom search modes to deliver concise results each time.

REGULAR DATABASE UPDATES

New and updated material is added regularly to the *Health & Wellness Resource Center*. New periodical and newspaper articles are added daily and most reference materials are reviewed annually.

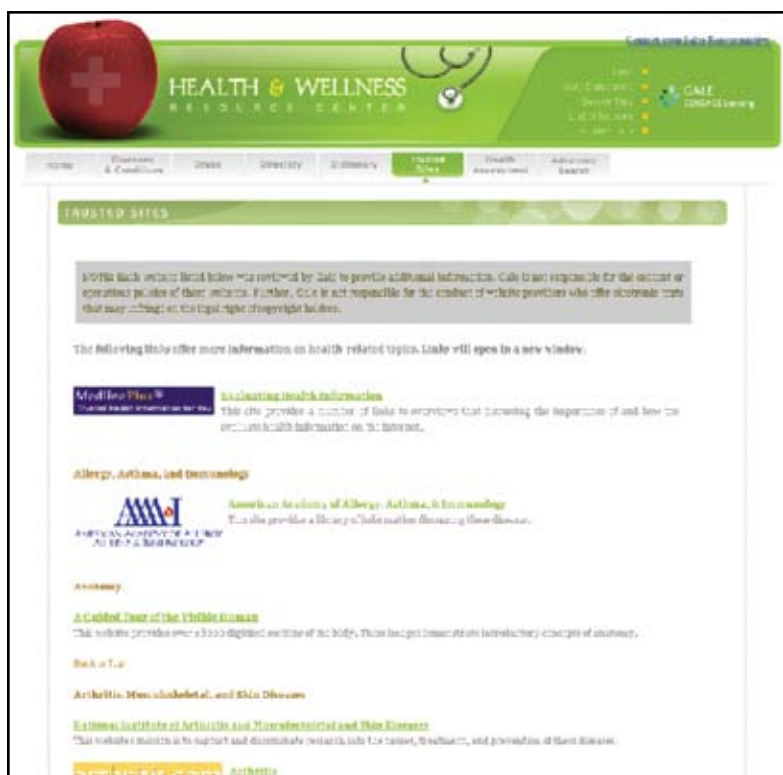

ADD-ON MODULES

This database is designed to meet the need for a full range of health information, from specific technical topics to general interest subjects. In addition, the *Health & Wellness Resource Center* offers add-on modules to meet growing needs and stay current with trends.

NOW AVAILABLE:

Alternative Health module — one of the hottest trends in medicine is fully explored, offering a one-stop, full-service resource for alternative and complementary therapies. It provides a rich collection of books, journals, magazines and pamphlets for consumers and health care professionals.

Disease Profiler module — presents health-related statistics gathered from nearly five million people across the United States. Easy-to-read charts and graphs cover disease prevalence by age and gender, costs of treatment, the drugs most commonly used for treatment, and more.
